1 Reset router

- 1.1 Connect the router to power supply.
- 1.2 Press and hold this button for more than 10 seconds to reset the router to its factory default settings.

2 Setup router

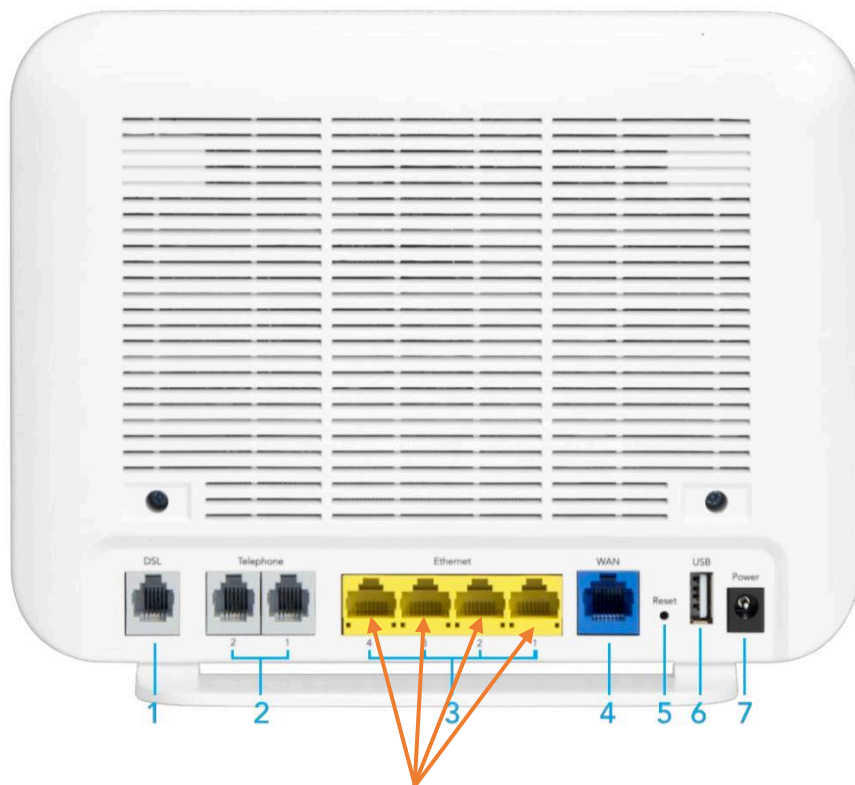

- 2.1 Using an Ethernet cable to connect the DSL port.

2.2 There are two methods to connect with your router:

Ethernet cable connection

2.3 Turn off the WiFi on your laptop/PC and connect laptop/PC with any of LAN ports (1 –4 of router) via Ethernet cable.

No.3; those 4 ports are LAN ports
Connect any of them with your computer

WiFi connection

You can use your laptop, tablet or phone to connect with router for setting through WiFi.

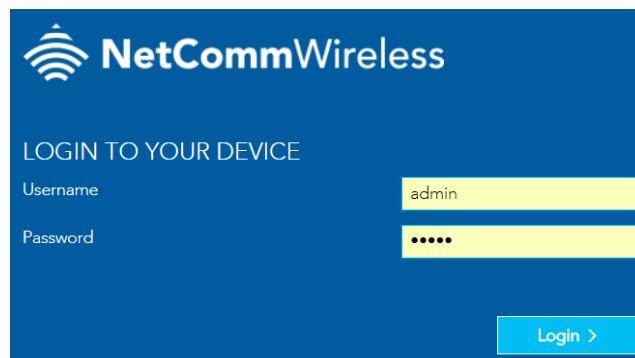

2.4 You can find the default SSID and wireless security key at the bottom of router.

2.5 Click the network icon of your computer or go to Wi-Fi Settings of your smart device, and then select the SSID to join the network.

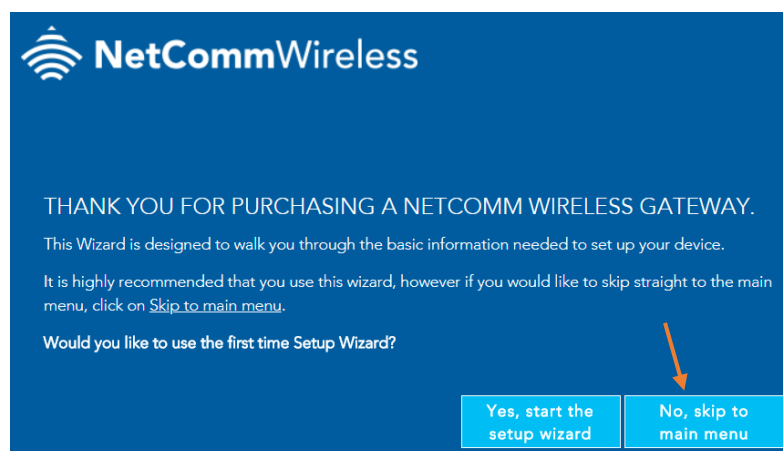

***Careful:** *Once your device connect with haven't configured router, your device will temporarily out of Internet. So please do not use the device which is currently using Internet.*

3 Login WIFI configuration page

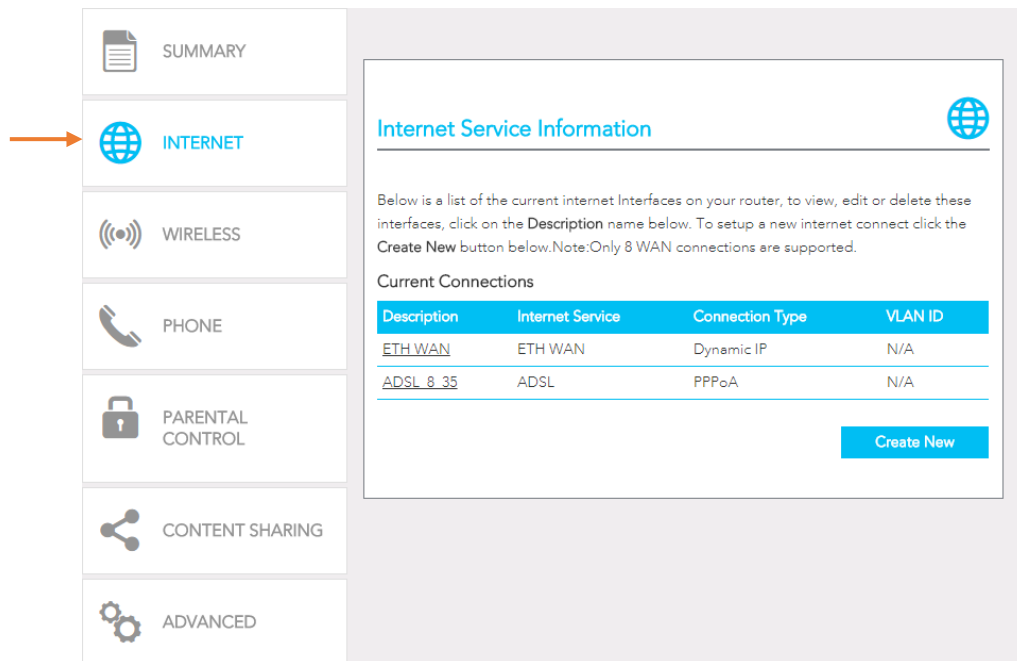

3.1 Open Internet browser (e.g. Google Chrome, Safari, etc.) and input <http://192.168.1.1/> or <http://192.168.0.1/> in the address bar to visit router's configuration page. The default username and password for this router is: **admin** (all Lowercase)

The image shows the login page for a NetCommWireless device. It has a blue background with the NetCommWireless logo at the top left. Below the logo, it says "LOGIN TO YOUR DEVICE". There are two input fields: "Username" with the text "admin" and "Password" with masked characters ".....". A "Login >" button is at the bottom right.

3.2 Skip to the main menu

The image shows the setup wizard screen for a NetCommWireless gateway. It has a blue background with the NetCommWireless logo at the top left. Below the logo, it says "THANK YOU FOR PURCHASING A NETCOMM WIRELESS GATEWAY." and "This Wizard is designed to walk you through the basic information needed to set up your device." It then says "It is highly recommended that you use this wizard, however if you would like to skip straight to the main menu, click on Skip to main menu." and "Would you like to use the first time Setup Wizard?". There are two buttons: "Yes, start the setup wizard" and "No, skip to main menu". An orange arrow points to the "No, skip to main menu" button.

3.3 Once you login, on the sidebar, click Network

3.4 Click the name of existing Current Connections and Delete

Edit Existing

Description: (Input 0~32 characters)

Internet Service:
☐ ADSL ☐ VDSL ☒ Ethernet WAN

Connection Type:
☐ PPPoE ☒ Dynamic IP ☐ Static IP ☐ Bridge

802.1P: (0-7)

VLAN Tag: (0-4094)

[Update](#) [Delete](#) [More Options](#)

3.5 After empty the Current Connection, click Create New

[Create New](#)

3.6 Choose Internet Service to VDSL and change connection Type to PPPoE

Edit Existing

Description: (Input 0-32 characters)

Internet Service:
☐ ADSL ☐ VDSL ☒ Ethernet WAN

Connection Type:
☐ PPPoE ☒ Dynamic IP ☐ Static IP ☐ Bridge

802.1P: (0-7)

VLAN Tag: (0-4094)

- 3.7 Input the PPPoE username and password provided by us, then click “Save”. You can find these username and password in the Service Activation Notice Email. (Ensure the Connection Mode is Always on and please save other as default.)

CONNECTION TYPE

☒ PPPoE ☐ Dynamic IP ☐ Static IP ☐ Bridge

Username: ← Username and Password

Password: ← Username and Password

802.1P: (0-7)

VLAN Tag: (0-4094)

- 3.8 After a while, the third on the left light of your router is solid green which means you can access the Internet now.

4 Optional: Change your WiFi name and password

4.1 Change WiFi name & Password/PIN:

Click Wireless. You can enter your WiFi name in Wireless Name and Password in this page. Click "Save" bottom after changing.

Wireless ☒ 2.4 GHz ☐ 5 GHz

Main ☒ On ☐ Off Guest ☐ On ☒ Off

Name: NetComm 8101 Name: wl1_Guest1 Change your WiFi name in here

Password: Password: Change your WiFi password in here

Save More Settings

You can change your 5GHz WiFi in here Things are same with 2.4GHz page

***Note:** Because NF18ACV is a dual band router, so it has 2 bands 2.4GHz and 5GHz. The settings in 2.4GHz and 5GHz are same.

***Careful:** Once you change your WiFi name or password, your device needs to reconnect with WiFi.
